

## IN SITU REMEDIATION & SITE RESTORATION

mc<sup>2</sup> oilfield services has acquired proprietary technology empowering us to provide solutions on site. Our TEAM provides a full service in-situ remediation & restoration package. Delivering the technical support, products and crews to address any of your remediation/restoration needs.

### In-Situ Bio-Remediation of Hydrocarbon

Hydrocarbon In-Situ Remediation eliminates the need of Remove and Replace remediation. It is an economically feasible and environmentally friendly solution that significantly shortens site impact time. This solution typically costs a fraction of typical Remove and Replace. This method also is highly efficient for sodium (salt) contamination.

- Controls & limits environmental liability
- Fast cost effective pit closures
- No hauling of drill cuttings
- No land farm risk
